Criteria Used for this Report

The criteria selected when running this report

Intent: This report is designed to provide an easy display of all users that have the Leadership Coach and Hub Leadership Coach role. This is accomplished by displaying information from the user record for those users and also displaying all the hubs/programs that the user is a leadership coach for.

Criteria:

Criteria Name	Optional?	Description
Program(s), Hub(s), Cohort(s), and State(s)	No	<p>This filters the users and roles that are included in the report. All programs, hubs, and cohorts that are selected will be combined into a distinct list of programs. This is accomplished by determining what programs exist in the selected hubs and cohorts, and then adding that list of programs to the list of specific programs that were selected by the user. After that, any duplicate programs in the combined list are removed. Only users that have a Leadership Coach or Hub Leadership Coach role for the programs in the de-duplicated list will be included in the report.</p> <p>NOTE: Only certain users have access to the hub, cohort, and state criteria. Most users will only have access to the program criteria and only have one option in that program list.</p>
