Program(s), Hub(s), and Cohort(s)	No	<p>This is used to determine which children will be included in the report. All programs, hubs, and cohorts that are selected will be combined into a distinct list of programs. This is accomplished by determining what programs exist in the selected hubs and cohorts, and then adding that list of programs to the list of specific programs that were selected by the user. After that, any duplicate programs in the combined list are removed. That de-duplicated list determines which children are included in the report by requiring that children be enrolled in at least 1 of the programs.</p> <p>NOTE: Only certain users have access to the hub and cohort criteria. Most users will only have access to the program criteria and only have one option in that program list.</p>
